

My first Spritzy's I bought from Ferdie Coetzer. Not knowing very much of the strain I started very slowly. I was not very into it. After a while I started looking at best pigeons of the year in Pretoria. And my eye caught a Spritzy that was a decendent of 2300. I immediately started looking for this blood. I found a pair at Fred Coetzer, and ask if he would sell the birds. They are all pieds and was the first pieds in my loft. Short period of time went by, when my friend Danie Scholtz said that he decided to concentrate on specific strains and going to sell his Spritzy's. He sent me a inbred 2300 hen as a present. And from there on my Spritzy's family started , basically on the 2300 line. I wonder how many winners descent out of that 2300 cock untill today.
